InfusionPoints Cloud Service offerings

Simplifying and accelerating your compliance

ADVISORY – We can help you determine what you need to do

Keeping your AWS cloud infrastructure secure requires more than automated security tools. It requires advanced technology and a team of certified AWS experts to assist you along the way. InfusionPoints supports the full Software development lifecycle (SDLC) of your AWS cloud infrastructure including **Building**, **Managing**, and **Defending** your infrastructure.

InfusionPoints advisory team is with you through each step of your AWS journey:

- We begin that journey with a gap analysis to determine your baseline requirements and gaps.
- We develop a strategic roadmap to help you make decisions along the way
- We assist you with your key design and development decisions
- We support you with a Secure by design Cloud Architecture
- We assist you in establishing a Cloud Security Program Management Team

We can build a Secure Infrastructure for your Cloud Service

XccelerATOR is an automated secure Infrastructure as Code framework that is engineered to meet strict DoD and FedRAMP control requirements. It is a turn-key solution for accelerating the ATO process for our customers. We have engineered a secure and compliant framework, that can be built in AWS cloud environment for your Cloud Services to integrate into. In addition, XccelerATOR also delivers the required documentations to meet the rigorous ATO process requirements.

We can host your Cloud Service

XBU40 is our Multi-Tenant FedRAMP Compliant environment that was built leveraging our XccelerATOR Framework. XBU40 is hosted in AWS GovCloud and AWS East-West and can meet FedRAMP Moderate and DoD SRG IL4 Requirements.

We can streamline your GRC all in one place

Command Center is a serverless Governance, Risk, and Compliance (GRC) application that is hosted on Amazon Web Services (AWS) developed by InfusionPoints to streamline ticketing, Continuous Monitoring, user management, and assist organizations in rapidly achieving and maintaining authorizations. Command Center integrates seamlessly with InfusionPoints' XccelerATOR and XBU40 frameworks to compound compliance acceleration for CSPs and Government Agencies. Command Center's newest feature, Audit Shield, is an automation-driven solution that streamlines evidence collection and control validation, making audits seamless and repeatable all within Command Center.

We can defend your Cloud Service 24X7X365

VNSOC360° is the perfect all-in-one solution to defend your cloud service offering. VNSOC360° managed security services, provides real-time, security event analysis and response across your critical infrastructure 24X7X365 leveraging US Citizens. VNSOC360° provides Threat Hunting, Penetration Testing, Vulnerability Scans, Endpoint Detection & Response, POA&M Management, Continuous Monitoring, and Incident Response.

**InfusionPoints provides the secure framework you need, the subject matter experts you trust,
and cutting-edge cybersecurity and continuous monitoring you need.**
